

# Luis Angel Godínez Padilla

Computer System Engineer

## EXPERIENCE

### Ayuntamiento de Guadalajara

#### Full Stack Web Developer

2022 - Present

- Design and development of a process automation platform: I was responsible for the design and creation of a web platform that allowed the automation of various processes related to public works.
- Development of customized functionalities: These functionalities included the automatic generation of reports, the management of access permissions and the creation of personalized control panels to monitor progress, deadlines, amounts and balances regarding current works.
- Testing and troubleshooting: Conducted extensive testing to ensure the quality and stability of the platform. Additionally, I worked on problem identification and resolution to ensure the satisfaction and success of platform users.

### INFEJAL

#### Full Stack Web Developer

2021 - 2022

- Design and development of a process automation platform: I was responsible for creating a platform that allowed the automation of various processes related to the construction of schools.
- Report automation: I implemented functionalities in the platform to automatically generate reports from database queries.
- Development of new modules: These modules addressed needs, such as resource management, cost tracking and task assignment, which contributed to greater efficiency and coordination in the management of works.
- Troubleshooting and technical support: Provided ongoing technical support to platform users, troubleshooting issues and providing guidance on proper use. This involved identifying and correcting errors, as well as implementing improvements based on user feedback.
- Interdepartmental collaboration: I worked in collaboration with the planning and finance departments, for the proper integration of the platform into the processes. I actively participated in meetings and work sessions to gather requirements and adapt the platform to the specific needs of each department.
